Do portable solar generators really work?

Amid the range of power stations, portable “solar generators” give you a way to draw in clean electric power from our most abundant resource, sunlight. However, using one effectively is a little more complicated than many people realize.

What is the best small solar generator?

Each small solar generator listed has different features that can fit specific needs. The EcoFlow River 600 is the best small solar generator due to its high input/output power. It has robust AC ports (600W continuous, 1,200W surge) and takes 1.6 hrs (wall charger) and 1.6-3 hrs (solar) to fully recharge.

Can a solar generator use solar power?

A solar generator can't actually harness solar power unless you have both. What's more, most of these generators are large enough that charging up exclusively with solar power usually isn't feasible: More often than not, you'll need to plug it in to charge, then use solar power to keep it going as long as possible.

What is a solar generator?
