

# **Small solar electric fence kit**

## Overview

---

Are solar-powered electric fence kits a good choice?

It is the most common issue faced with this product. Solar-powered electric fence kits are the perfect choice to fend off predators in remote areas. They offer a great alternative, as you can use them even when there is no AC power available. They are powerful and can easily send a jolt that can ward off any intruders invading your space.

How does a solar-powered electric fence work?

To operate this solar-powered electric fence set, the energizer takes a 12V deep cycle battery (it is not recommended for standard car battery) and runs on 10 watts of electricity from the solar panel included with a post bracket, but post not included. Whenever it concerns electric fences, there are a plethora of choices.

How long can a solar-powered electric fence last?

Here is a solar-powered electric fence kit that can operate even in the most remote fields or pastures. It can run smoothly for up to 14 days without the support of sunlight. It is powered by a rechargeable battery featuring a cabinet that is durable and water-resistant.

Are solar-powered electric fences a good option for livestock meadows?

Solar-powered electric fences are the finest option for several enthusiast farmers when it comes to fencing livestock meadows on their backyard or garden. Apart from being regarded as reliable and functional, they are also among the most affordable fence options available.

Does a solar-powered electric fence keep deer away?

This solar-powered electric fence kit from Hooyman makes it easy to keep deer at bay without resorting to toxic chemicals or unworkable barriers. Using this solar-powered electric fence set creates a fence around your yard and

plants by generating high voltage pulses that discourage wildlife from approaching your land.

Can a small electric garden fence keep deer out?

Our Solar Powered, Small Electric Garden Fence Kit can keep out rabbits and dogs. However, it is not recommended for deer. Spacing the posts at 8 foot intervals should provide coverage up to an 80 foot perimeter with 2 strands of wire.
