How do I use a solar pond pump?

Submerge the pump in your pond, bird bath or water feature at a depth that

allows for efficient intake and circulation. All our solar pond pumps feature a low water cutoff, so they will automatically pause if the water level drops too much. Turn on the pump and ensure it operates correctly before standing back to appreciate your tranquil oasis.

How does a solar power pump work?

for outdoor use, and is powered by a solar panel. In order to make the pump work by solar energy, the solar panel needs to be placed in direct sunlight with its solar cells facing the sun as much as possible. The performance of the pump depends on the sunlight intensity and the incident angle at which sunlight strikes the panel surface. The
