

Solar battery cost in victoria

Overview

While direct solar battery rebates in Victoria have ended, homeowners still have access to interest-free loans and finance options through the Solar Homes Program—making solar battery storage more accessible than ever. In this updated guide, we'll explain the current solar battery incentives.

While direct solar battery rebates in Victoria have ended, homeowners still have access to interest-free loans and finance options through the Solar Homes Program—making solar battery storage more accessible than ever. In this updated guide, we'll explain the current solar battery incentives.

In 2025, the solar battery cost for Australian households starts from \$4,500, with larger systems exceeding \$12,000. This variation depends on battery size, brand, and whether it's installed alongside solar panels or retrofitted into an existing system. There are two key rebates that can help.

The table below displays average, indicative battery installation prices from a range of installers around Australia, most of whom are active in the Solar Choice network. Prices include installation, GST and the federal battery rebate. *Includes the installation of the battery only. You must.

The price you'll pay for a battery with the rebate depends on whether you are: In this guide, I break down the real costs, explain which rebates are available and how they affect your payback. Typical installed prices for popular solar batteries in Australia: *These prices don't include a hybrid.

This comprehensive guide will break down the costs associated with purchasing and installing combined solar and battery systems, helping you make an informed decision tailored to your needs. All figures below already include the Cheaper Home Batteries Program rebate, assuming the installer assigns.

While the state's solar battery rebate (a direct cash rebate) has ended, it has been replaced with a generous interest-free loan to reduce your upfront costs. Eligible Victorian homeowners can access interest-free loans of up to \$8,800 for installing a home battery system, with the loan repaid over.
