

**Solar360 Mobile Energy**

# **Solar battery water pump**

easy to install and use

World wide Products

faster charging and discharging

Multiple protection with alarm systems

**Can save energy**

the battery capacity can be increased freely and flexibly according to the situation of home use.  
Rechargeable lithium batteries use safe LiFePO4

## Overview

---

What is a solar powered water pump?

A solar powered water pump is a device that uses sunlight to power its motor. We use these pumps to move water from one place to another, like from a well to a storage tank, or for irrigation purposes. They're powered by solar panels, which makes them a great eco-friendly choice. How do solar powered water pumps work?

Are solar powered water pumps the best way to move water?

Solar powered water pumps are quickly becoming the most popular way to move water. We'll show you the best kits on the market today.

Are solar powered water pumps a good idea?

One great way to harness solar power is by using solar powered water pumps. You might be using a water pump for your home, garden, or small business. Solar powered water pumps offer a budget-friendly and eco-conscious option to meet your water needs. Plus, they're easy to install and require low maintenance over time.

What is a solar water pump kit?

The Solariver Solar Water Pump Kit is perfect for large fountains, ponds, waterfalls and rainwater collection. Its solar panel comes with a stake and can be placed anywhere due to using the 16 feet long chord or even an additional 16' extension if needed.

Does a solar water pump have a battery backup?

The pump comes with an adjustable flow option, so you can customize the water flow for your specific needs. One issue with this solar water pump is that it doesn't come with a battery backup, which means that it will stop working

as soon as the sun goes down.

How do I connect a solar water pump to a battery?

To connect a solar water pump to a battery, first connect the “Input” cable of the battery back-up to a solar module or a DC power supply, and tighten the protection screw if applicable. Then, insert the pump plug to the “Output” socket of the battery back-up, and also tighten the protection screw. Make sure to keep the solar water pump fully underwater when it operates.
