

# **Solar cheap panels installation**

## Overview

---

How much does a home solar installation cost?

While this \$3.03 per-watt price tag is lower than solar panels have cost in the past, it's still a significant upfront investment. Cutting corners can help you save money, but you don't want to sacrifice quality when it comes to a big investment like a home solar installation.

What is the cheapest way to get solar panels?

The cheapest way to get solar panels is to identify all of the incentives and rebates available where you live and aim to meet the minimum requirements of those programs. Additionally, purchasing an entire system upfront is typically less expensive than buying a smaller system and adding components later. Are cheap solar panels worth it?

.

Can You DIY install a solar energy system?

Kits and panels are available from some manufacturers that are designed for DIY installation. Installing your own solar energy system can cut labor charges out of your total system cost. However, DIY installation requires you to obtain your own permits, and you're on your own when it comes to receiving rebates and applying for tax incentives.

How do I choose the most affordable solar panels?

The most affordable solar panels for you will likely be a combination of those attributes, rather than the actual number on the price tag. An excellent place to start looking for the best deal is to start with inexpensive solar panels and work your way through the numerous decisions you'll eventually make when choosing your system.

Are solar panels cheaper than a professional installation company?

Yes and no. Solar panel kits are much more affordable than having a professional installation company install a solar array for you. However, affordability upfront isn't the only factor. Trying to take your home off-grid is a huge task that most people, frankly, aren't up to.

How much do solar panels cost?

Cost per watt (20 points): The cost of solar panels is one of the most important factors, as the price can range from \$2.50 per watt to well over \$3 per watt. Many homeowners consider the price of solar panels when doing their research, which is why we always include this data point in our methods.
