

# Solar cold room manufacturers

## Overview

---

What is a solar powered cold room?

Solar powered cold rooms are an affordable storage solution for any agriculture goods, such as fish, vegetables, beverages and dairy products. The compact design allows for low shipping costs; 6 kits can be shipped in a 40ft container. The equipment is easy to handle. All parts can be assembled by hand, and no crane or heavy truck are required.

What is a solar cold storage room?

Solar cold storage rooms are an affordable storage solution for any agriculture goods, such as fish, vegetables, beverages and dairy products. 1. PU Sandwich Insulation Panels With Cam-lock We already had exported cold room freezer for fish to over 45 countries.

What is the temperature range of a solar powered cold storage system?

These systems can be configured by the end user in the temperature range of -4 to 15 C. Inficold design and manufacture solar powered cold storage in both container and indoor cold room options. The containerized units are quickly deployable and require minimal civil work at the site.

How termodizayn solar-powered container type cold storage works?

You can store your products 24/7 regardless of the grid power anywhere you like with Termodizayn solar-powered container type cold storages. With container type cold rooms operating with solar energy, you can easily solve cold storage problems and post-harvest loss problems in perishable foods such as fruits, vegetables, meat and meat products.

How a containerized solar cold storage system works?

The containerized units are quickly deployable and require minimal civil work at the site. This technology is modular and multiple of thermal energy storage can be integrated on larger cold storages. In fact, the top three largest solar

cold storages based on thermal energy storage in India are designed and installed by Inficold.
