At SCS Australia, we provide advanced solar skid shipping containers designed to deliver reliable, renewable energy wherever you need it. Perfect for remote projects, off-grid living, and temporary sites, these containerised solar systems combine durability, portability, and sustainable.

At Modbox, we design and build shipping container solar solutions to securely house your solar panels, batteries, inverters, and other equipment. Whether you're powering a remote worksite, an off-grid project, or a backup energy system, our containers are built tough for Australian conditions.

A Containerised Off-Grid System comes with up to 107kW of solar panels on SMA TriPower solar inverter (s), up to 320kWh of Lithium batteries and up to 12 x SMA Sunny Sunny Island battery inverter/charger. These are configured as 3 phase systems inside an air-conditioned and insulated shipping.

Our offgrid solar containers are designed to be a portable system to enable power on site quickly and easily. If you are using the container as a permanant power supply, an electrician will be required to install suitable earthing & testing Our offgrid shipping containers are a self contained.

The final cost of a solar container system is more than putting panels in a box. This is what you're really paying for: Solar panels: Mono or poly crystalline material quality, wattage size, and efficiency influence cost. Battery storage: Lithium-ion vs. lead-acid significantly impacts cost and.

This is the ultimate portable power station – a 20 foot container decked out with full off grid power equipment. Includes a large Victron Quattro 10kVA inverter, 10kWh lithium batteries and 4.95kW of Solar installed on the roof with slide out & folding Solar panel mounting for easy transport and.
