

# **Solar home backup power solutions**

## Overview

---

What is a whole home battery backup power system?

Whole home battery backup power systems store electricity to power your entire home during outages. Charged by solar panels or the grid, these batteries automatically kick in when the power goes out, keeping lights, appliances, and essential devices running.

What is solar power backup?

Solar power backup refers to the essential part of a solar power system that keeps it running no matter what. Having backup power ensures you always have a system to provide power for you and your family. In this blog, we'll talk about how backup power works when you have solar panels.

Do solar panels provide a free supply of backup power?

With a handful of well-placed solar panels, you can provide a FREE supply of backup power for your home. Today, solar home backup power is within reach of everyone. Over the past few decades, the steady march of technology has extended battery life and made solar panels less expensive and more efficient.

What is a solar backup generator?

Solar backup generators provide a portable solar power supply. Instead of having a permanent solar installation in your home, complete with roof panels and a large battery bank, a solar generator packages everything in one relatively small unit. Solar backup generators have five main components: Solar panels to capture sunlight.

How much does a home backup system cost?

Installing a whole-home backup power system can cost between \$5,000 to \$30,000, depending on system size, battery type, installation complexity, and whether it includes solar. [How to choose a Home Backup System?](#)

When choosing a home backup system, consider your power needs, which depend on which and how many appliances you want to run.

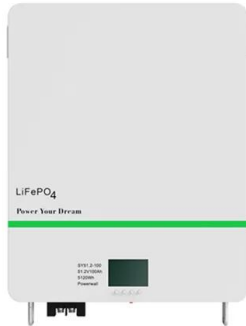

Which backup power solution is best for your home or office?

If you were wondering which backup power solution was best for your home or office we have some great recommendations for you. If you live in a small home or apartment, a small inverter with battery backup and/or rechargeable lights could be the perfect solution for you.
