

# **Solar king roof ventilator**

## Overview

---

What is a solar roof ventilation fan?

Solar Roof Ventilation Fan extracts the dry and hot air in the roof. Australian summers continue to get hotter and so do our homes and workplaces. A great solution to tackle this is Solar Exhaust Fan.

What is solar roof ventilation?

By replacing the hot air in your roof space in summer with the cooler outside air, Solar Roof Ventilation make your home much cooler and a big difference to your indoor comfort level. Lithium batteries are the future of battery storage, being lighter and lasting up to 8 times the cycle life of lead acid batteries.

How hot does a solarking roof ventilator get?

SolarKing Solar Roof Ventilator, roof temperatures during summer often reach 50 to 70°C. The best way to reduce the heat is to install the SolarKing.

Does a solarking solar exhaust fan work?

In the hot Australian summer, the SolarKing Solar Exhaust Fan extracts hot air from your roof space up to 20 times more effectively than a wind-driven Whirly Bird, reducing roof temperatures by up to 30°C.

How does a solarking roof fan work?

**High Airflow:** The SolarKing roof fan moves an impressive 2100 cubic meters per hour (CBM), significantly more than traditional wind-driven “whirly birds.”  
**Temperature-Controlled Operation:** The fan starts working when your roof space reaches 25°C, ensuring it doesn’t remove warm air during winter when heating is essential.

Why should I buy a solarking V3 solar exhaust fan?

If you're looking to stay cool this summer while saving on electricity bills, let the free power of the sun do the work for you with the new SolarKing V3 Solar Exhaust Fan. Choosing a selection results in a full page refresh.
