

Solar panel for home near me installation

Overview

How do I find the best solar installer near me?

Follow these tips to hire the best installer near you: Look for installers who are members of the Solar Energy Industries Association (SEIA) and certified by the North American Board of Certified Energy Practitioners (NABCEP). Read their reviews on HomeGuide and Google. Get at least three in-person estimates to compare.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole-home solution.

Does Home Depot install solar?

During your free in-home consultation, The Home Depot's local solar power installer will clearly explain the installation process and how easy it is for you to go solar. By powering your home with clean, renewable solar energy, you're creating a healthier environment and conserving natural resources.

Why should you install solar panels on your home?

Cleaner air, water and food for everyone. Having professional designers and experts install solar panels on your home is a great first step to reducing your carbon footprint. Go solar and reduce energy costs to heat the water in your

home or in your pool. Our local professionals can install a system that fits your needs and budget.

Where do solar panels work best?

Solar panels work best for homes in sunny areas with southern or southwestern exposure and don't provide as much value in areas that are regularly cloudy or rainy. How long does it take to install solar panels?
