## Overview

---

A small residential solar panel system costs around \$14,210 before considering any financial incentives. On the bright side, that price effectively drops to \$9,937 after considering the full federal solar tax credit. Depending on your household energy needs, you might need a larger or.

A small residential solar panel system costs around \$14,210 before considering any financial incentives. On the bright side, that price effectively drops to \$9,937 after considering the full federal solar tax credit. Depending on your household energy needs, you might need a larger or.

The cost of solar panels depends mainly on system size, equipment quality, installation complexity, location and available incentives. Financing solar panels might be a good idea if your loan payments are less than your power bill. A small residential solar panel system costs around \$14,210 before.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

Solar panels cost between \$15,000 and \$22,500 before incentives for an average 2,000-square-foot home in the U.S. The MarketWatch Guides team obtained this data by surveying homeowners with installed solar systems nationwide. The actual price you will pay depends on a number of factors, including.

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt. The cost of a solar.

Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans. Our team of solar experts.

There are a handful of reasons to get solar panels for your home, but the biggest one is energy cost savings. Home solar is simply much cheaper than paying for grid electricity, and can lead to tens – sometimes hundreds – of thousands in savings over the warranty period of the panels. That's. How much does it cost to install solar panels?

Find a solar panel installer near you to get an estimate for your home. An average 1,500 square foot home will likely need 16 panels to cover its electric usage. If your home is shaded or faces east/west, you might need more than 16 panels. While panels themselves cost \$0.70 to \$1.50 per watt, the price to install solar panels costs \$3.20 per watt.

How much do solar panels cost per watt?

In the late 2000s, solar panels had an average cost of \$8.50 per watt . Today, solar panels are much more efficient and cost-effective than ever, with the average cost down to around \$2.77 per watt.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

How much does home solar cost?

The average pre-incentive cost of home solar is \$29,161 for a three-bedroom house, or \$20,412 after claiming the 30% tax credit. However, as shown in the chart below, the number of bedrooms isn't a great indicator of the size and cost of a solar system – and neither is living space, for that matter.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

Why do solar panels cost so much?

Another factor influencing solar panel costs is the type of panel you have

installed. Monocrystalline photovoltaic (PV) panels are the most common — and preferred — type of solar panel. They are also the most efficient option, which means that they often cost more than panels with lower efficiencies.
