Scams, schemes and straight-up fraud abound in the dark underbelly of an otherwise light-filled industry. While there are still many honest and reliable solar panel companies on the market, it can be hard to differentiate the good guys from the rest. Here are red flags to look out for when.

In the worst cases, homeowners have been left making payments on overpriced systems that don't work, with little to no support from the installation company that put the panels on their roof. To avoid getting scammed, you need to know what to look out for and when to walk away. Here's our guide to.

As solar grows in popularity, more scammers are targeting consumers. Here are three common solar scams to look out for, how to avoid them and how to report solar scams. » MORE: Pros and cons of solar panels There's no such thing as free solar panels. There are no federal government giveaways for.

While rooftop solar panels are becoming increasingly ubiquitous in homes throughout the United States, the industry also has a more sinister side: a seemingly widespread problem of fraudulent business practices that has cast a shadow over many solar panel companies. Dissatisfaction with the solar.

sumer complaints about a small number of unscrupulous solar companies. People complain that they were deceived about costs and savings, misled about loans and with the Cons check what resources are available in your state: [usa.gov/state-consumer-purchase-agreement](https://www.usa.gov/state-consumer-purchase-agreement), or subscribing to a community

solar.

Be aware of solar energy scams – everything from scammers pretending to be affiliated with the government or utility company to businesses misrepresenting the cost of improvements, savings, and financing options. If your company offers solar energy, remember that claims must not only be truthful. What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.

Are free solar panels a scam?

Remind prospective customers that while tax credits, rebates, and incentives might be available for solar purchasers who qualify, offers for “free” or “no cost” solar panels are scams. Comply with the law: old and new. Reputable companies know the importance of being honest about what they’re offering – and how much it costs.

How do I know if a solar company is a scam?

Look up existing scams. The Better Business Bureau has a free scam tracker. You can search by company name or keyword to see if there are any active scams in your area. Ask questions. A legitimate solar company will be happy to answer questions. If they get pushy or dodge your questions, that's a red flag.

How does a solar installation scam work?

How the scam works: People posing as solar installers or utility employees call or come to your home and offer free solar panels through made-up government programs or incentives. Sometimes they also claim their company will cover the cost of installation by providing huge rebates.

Are solar reviews a scam?

One-star reviews on the industry website Solar Reviews have increased more than 1,000% since 2018, according to NPR. Many companies allegedly participate in fraudulent practices in an attempt to scam homeowners out of their money. Despite this issue, the solar industry is continuing to broaden its reach.

Are solar energy companies scamming consumers?

As solar energy has boomed over the years, some companies "have preyed on consumers by offering predatory and costly loans," and many of them "are engaging in overly aggressive sales tactics or are outright scamming consumers," said CNET.
