

Solar panel installation cheap

Overview

AXITEC, Jinko Solar, LONGi Solar, REC Group, and QCELLS are our top picks for the best cheap solar panels based on their price per watt (\$/W) and performance. Solar panel affordability continues to increase thanks to falling prices, incentives, rebates, and flexible financing options. How much does a home solar installation cost?

While this \$3.03 per-watt price tag is lower than solar panels have cost in the past, it's still a significant upfront investment. Cutting corners can help you save money, but you don't want to sacrifice quality when it comes to a big investment like a home solar installation.

What are the cheapest solar panels?

Many of the EnergySage Buyer's Guide's most affordable solar panel brands also produce some of the best solar panels. Here are our top picks for the best cheap solar panels based on the average cost per watt and performance. At just \$2.36 per watt, AXITEC offers the cheapest solar panels per watt on our list.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Are solar panels cheaper than a professional installation company?

Yes and no. Solar panel kits are much more affordable than having a professional installation company install a solar array for you. However, affordability upfront isn't the only factor. Trying to take your home off-grid is a huge task that most people, frankly, aren't up to.

Should you buy cheap solar panels?

Ultimately, a panel could be more expensive per watt but save you more in the long run, ultimately making it a cheaper option. If you're looking to buy cheap solar panels, we recommend looking at options from Q Cells and LONGi, in particular.

How much does solar cost per watt?

Expect to spend between \$2.50 and \$3.50 per watt for solar panel installation when accounting for labor and materials. You might save between \$650 and \$1,500 per year on electric bills when switching to solar energy. Homeowners can take a 30% tax credit for solar panel installation until 2032.
