Use our calculator to quickly get price cost estimates for solar tailored to your home. SolarReviews has both an extensive collection of unbiased consumer reviews of U.S. solar companies and an expert ranking system to help you identify the best solar panel installation companies in your area.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

How do I get a solar panel installation project started?

Get your solar panel installation project started by requesting a free in-home energy consultation using the form above. Our licensed, local professionals will review your solar energy needs, provide product recommendations, and review your pricing and financing options.

What does a solar installer do?

According to the Bureau of Labor and Statistics, “Solar photovoltaic (PV) installers assemble, set up, and maintain rooftop or other systems that convert sunlight into energy. Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid.”
