

Solar panel installation long island ny

Overview

Why should you install solar panels in Long Island?

It's the price of electricity. We can't fix the high taxes or the traffic on Long Island, but we can make your electricity more affordable. Solar panel installation at your home in Long Island will give you independence where you take less from the grid and save more every month.

What are people saying about solar installation services in Long Island?

What are people saying about solar installation services in Long Island, NY?

"We have had solar panels installed for over a decade (since Superstorm Sandy.) Had a maintenance check and our techs Alex and Antonio were amazing. Very polite and professional!.

Why is solar a good option for Long Island power solutions?

Solar is efficient, without any of the waste that is seen on the grid. Solar is more reliable, especially with a battery backup system. Solar is more affordable, with significant savings even when financing a system. Every Long Island Power Solutions solar installation comes with a 25 Year Warranty! Solar works year-round.

Why should you choose Long Island power solutions?

Reduce or in some cases eliminate your monthly electric bill with Long Island Power Solutions. We offer residential solar installation with flexible financing and no money down. Use your expected tax credits to enjoy an initial interest-free period before the regular term loan. Solar at home gives the reliability and affordability that you demand.

Why should you choose a solar panel installation service?

More than 5,000 homes throughout Long Island and New York City have become energy independent with our solar panel installation services. The

benefits of solar more than make up for the initial investment. Solar is cleaner, helping to offset your carbon footprint and protect our environment.

Does long Island power solutions offer a warranty?

Every Long Island Power Solutions solar installation comes with a 25 Year Warranty! Solar works year-round. With net metering benefits, the excess energy you produce in the day will offset any electricity that you import in the evenings.
