Overview

How do I install a solar power system?

Determine the location of the electrical roof penetration and wire run, if wiring is planned for this area. CHECKING THE SOLAR POWER SYSTEM INSTALLATION LOCATION Determine the wind loads for the installation site. Check with your local building and safety department for the specific requirements.

How do I choose a solar power system installation site?

CHECKING THE SOLAR POWER SYSTEM INSTALLATION LOCATION Determine the wind loads for the installation site. Check with your local building and safety department for the specific requirements. Make certain that the roof structure can support the live and dead loads resulting from the installation of the PV array.

Can a photovoltaic module be used with a framing system?

The framing system has only been evaluated by UL for use with the photovoltaic modules listed in this manual. This manual contains critical information regarding electrical and mechanical installation and safety information which you should know before starting installation.

How do I install a photovoltaic module?

Install wires and cables with appropriate hardware in accordance with applicable electrical codes. Protective earth grounding of the individual photovoltaic modules is achieved by securing the modules to the mounting frames. The assembly instructions should be closely followed, in order to ensure a reliable ground connection.

What equipment do I need to install solar panels?

A solar sitting device or Solar Pathfinder is very helpful for assessing its shading. The Solar Pathfinder's compass doubles as an orienting compass if needed. A lightweight camera is also invaluable. Initial site visits must be

thorough enough to get accurate information needed to complete the design and plan the installation. Anything less will.

How do you install a solar module on a roof?

Place the solar module on the rail so that it fits between the high points of the rail, facing the ridge of the roof. The solar module will slide forward slightly and will engage the locking clip (as shown). 3. Push the solar module forward and rotate down to fully engage the locking clip (as shown).
