

Solar panel installation west palm beach

Overview

Who are the best solar companies in West Palm Beach?

With that in mind, here's our ranking of the top five solar companies in West Palm Beach, FL based on ratings, reviews, and more. We are preferred installers with Q Cell, REC, K2 racking, and Enphase. We are ranked by EnergySage as one of the . Airis Energy Solutions: Your path to a greener future.

Why should I install solar panels in West Palm Beach?

Average daily sunlight: Since West Palm Beach gets lots of sunlight, your solar panel system will most likely be able to produce enough energy to power your whole home, which influences how much you can save on your energy bills. Your energy consumption: If your home needs to use a lot of energy, you'll benefit more from installing solar panels.

How much does solar cost in West Palm Beach FL?

The average price per watt of solar power in West Palm Beach, FL is \$2.39/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$24,934 for a 14.93 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

Do solar installers need a certification?

Certifications aren't necessarily required, but are a great way to weed out lower quality installers. The North American Board of Certified Energy Practitioners (NABCEP) offers an industry-leading certification program, while the PV Installation Professional (PVIP) Board Certification is the gold standard for solar installers.

Should you hire a solar installer?

Solar is a growing industry that attracts contractors from many

backgrounds—sometimes only loosely related to solar. But to feel confident in your solar panels, you'll want to work with an installer that has plenty of experience in custom designing systems.

How do you know if a Florida solar company is a good company?

Below are some the criteria we examined specifically for Florida solar companies Brand reputation and certifications (20%): We take each company's Better Business Bureau (BBB) score into consideration, as well as how long the installer has been in business (at least 5 years is required, 10 preferred) and what type of solar certifications it holds.
