Here are the 10 best solar panel installers near you rated by your local neighborhood community. Want to see the top 10?

What is a solar installation warranty?

An installation warranty covers the labor, service, and workmanship aspects of your solar system. Offered by your installer, contractor, or solar company, installation or workmanship warranties are essential in guaranteeing the quality, longevity, and ROI of your installation.

What warranties does a solar system have?

Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1.

**Product warranties** A solar product warranty covers the physical components of your system, such as the panels, inverters, or batteries.

**Are solar panels covered by a warranty?**

A solar panel warranty doesn't cover the performance of your other system components like your inverter, mounting materials, or battery. These products are covered by their own separate warranties and are also vital for your system's long-term value and performance. What's the power warranty on solar panels?

.

**What is a performance warranty on a solar panel?**

A performance warranty guarantees a maximum level of degradation – typically between .25% and .75% – per year so that in 25 years the panel will still have 80-90% of the power output it did in its first year. Performance warranties are important for sizing solar systems to maintain 100% offset for 25 years.

**Does a quality solar installation void a roof warranty?**

No, a quality solar installation should not void your roof warranty. In fact, some companies provide both roofing and solar installation services and provide warranties for both. However, it is very important to go through an experienced, reputable solar company that uses quality equipment and installation techniques.

**How long does a solar panel warranty last?**

The length of a product warranty varies based on the manufacturer and model. Traditionally, these warranties typically last 10-15 years, although it is becoming more common for premium panels to have 20 and 25 year product warranties. If a panel fails within the warranty period, the manufacturer will typically replace or refund the panel.
