

Solar panel mount for container EPC service price in Switzerland

Overview

What is a containerized movable solar system?

A Swiss start-up has created a containerized movable PV system that is designed to be easily relocated to allow the use of solar energy in locations where a fixed installation is not an option. The solution is based on a racking technology which can include two racks able to host up to 30 solar panels. The Triptic solar array. Image: PWR Station.

How many solar panels can a racking system hold?

The solution is based on the company's Exorac Tryptic racking technology which can include two racks able to host up to 30 solar panels. The system can be retracted, tilted and locked into the container, which the manufacturer says protects it from threats such as theft, vandalism or hurricanes.

Which mounting system does solarfuture APs use?

For the mounting system of this record-breaking installation, the contractor SolarFuture ApS relied on the high-performance MSP-FR east-west mounting system from Schweizer – a solution that perfectly combines innovation, efficiency and sustainability.
