

Solar panel price list

Overview

Get solar power system costs based on your location, roof, power usage, and current local offers. Published: August 2025 Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system.

Get solar power system costs based on your location, roof, power usage, and current local offers. Published: August 2025 Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system.

People with solar panels can save around \$62,219 on utility bills over 25 years. The cost of solar panels depends mainly on system size, equipment quality, installation complexity, location and available incentives. Financing solar panels might be a good idea if your loan payments are less than.

Get solar power system costs based on your location, roof, power usage, and current local offers. Published: August 2025 Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

Sort and filter solar panels by price per watt, efficiency rate, intended use, and more to find the perfect match for your energy & budget requirements.

Solar panels cost \$0.70 to \$1.50 per watt on average but can run from \$0.30 to \$2.20 per watt. A typical 250 watt panel costs \$175 to \$375 on average. For an entire solar system, the average homeowner pays \$3,910 to \$6,490. Panels can cost as low as \$1,890 and as high as \$13,600. This price depends.

The average cost of a residential solar panel system ranges from \$18,000 to \$43,000, depending on the system size, location, and available incentives.

Typically, a 6-8 kW system—suitable for an average 2,000-square-foot home—will cost between \$15,000 and \$22,500 before applying any incentives. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much do Solar shingles cost?

Solar panels are the most popular choice for solar energy, but they are not the only option. If your budget allows, solar shingles cost \$4 to \$14 per watt and look like traditional roof shingles, blending in better with the surroundings and offering a sleeker alternative to standard solar panels. Are solar panels worth it?

.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?

.

How much does a CPV solar system cost?

Concentrated photovoltaic (CPV) panels are \$0.80 to \$1.10 per watt. While not as well-known as other types of panels, CPV panels are highly efficient and may grow in popularity. A 6 kW solar system would cost \$4,800 to \$6,600. A single solar cell costs about \$0.30 and most panels use 60 or 72 cells. The more cells in a panel, the higher the cost.
