Solar panel storage box quotation in France 2030

Overview

What is the future of solar energy in France?

The solar photovoltaic (PV) segment is expected to dominate the market during the forecast period, owing to increasing solar PV installations across the country. France aims to produce 33% of its total energy from renewables, especially solar energy by 2030.

How much solar energy does France have in 2022?

In 2022, France's solar PV installed capacity accounted for more than 17.41 GW. Solar PV had over 26% share in the total renewable energy mix. This is due to increasing projects on solar energy across the country. France has announced a new 10-measure plan to accelerate the development of photovoltaic energy, featuring new and existing provisions.

How many GW of solar PV will France have in 2023?

In April 2023, the French government announced the launch of two new tenders for a total of 2.3 GW of total capacity, a 1.5 GW tender of ground-mounted PV and 800 MW for rooftop capacity. The tender will be launched in June 2023. In February 2022, France government planned to have more than 100GW of installed solar PV capacity by 2050.
