To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of Energy and prices from 54 retailers and manufacturers for popular solar panel brands. This chart refers to the average cost range across all common solar system sizes. Cost will vary depending on.

Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans. Our team of solar experts.

The cost of installing solar is far less intimidating when you understand the various components, how savings are generated, and different ways to lower your cash outlay through financing. In this article, we'll explore: Do solar panels really save you money?

As always, our goal is to empower you.

Use our calculator to quickly get price cost estimates for solar tailored to your home. SolarReviews has both an extensive collection of unbiased consumer reviews of U.S. solar companies and an expert ranking system to help you

identify the best solar panel installation companies in your area.

Solar panel installation costs a national average of \$18,180 for a 6kW solar panel system for a 1,500 square ft. home. The price per watt for solar panels can range from \$2.50 to \$3.50 and largely depends on the home's geographical area. Residential solar panels are usually sized between 3 kW and 8. How much does solar panel installation cost?

Solar panel installation costs depend on your home's size, energy needs, roof structure, and location. You can estimate around \$10 to \$15 per square foot of living space for solar panel installation. Keep in mind, this estimate doesn't account for tax credits or local incentives, which can significantly reduce your final cost.

How do I get a price estimate for solar?

Use our calculator to quickly get price cost estimates for solar tailored to your home. SolarReviews has both an extensive collection of unbiased consumer reviews of U.S. solar companies and an expert ranking system to help you identify the best solar panel installation companies in your area.

How much does a solar system cost?

On average, solar panels cost about \$9.34 per square foot of your home's total living space. This means a solar system costs about \$13,075 for a 2,000-square-foot house, including the solar tax credit. Note: Using square footage to estimate home solar system costs only offers a rough guide and will not provide a truly accurate price.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

What is a solar cost calculator?

Our solar cost calculator is a great tool for getting a sense of how much solar costs and how much you can save by going solar. However, every calculator is limited by its assumptions and its results should be taken with a grain of salt.

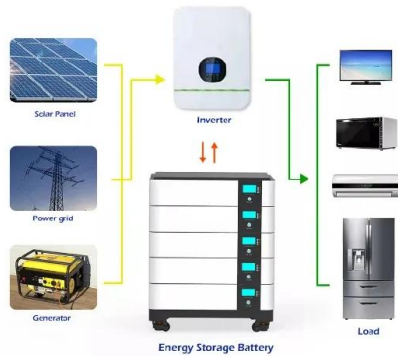

How much do Solar shingles cost?

Solar panels are the most popular choice for solar energy, but they are not the only option. If your budget allows, solar shingles cost \$4 to \$14 per watt and look like traditional roof shingles, blending in better with the surroundings and offering a sleeker alternative to standard solar panels. Are solar panels worth it?
