

# Solar panels for charging

## Overview

---

### Can You charge a battery from solar panels?

If you've been looking for an eco-friendly and sustainable way to power your devices, then charging from solar panels may be the answer! With a solar panel system, you have access to an energy source that's virtually endless and renewable. In this blog post, we'll provide you with an in-depth guide on how to charge a battery from solar panels.

### What are portable solar panels & solar battery chargers?

Portable solar panels and solar battery chargers are easy-to-use devices that provide backup power to anyone who happens to be away from a working power outlet, including hikers, car campers, and even people looking to keep their devices running during a power outage at home.

### What is a solar battery charger?

When you're shopping, the terminology can be confusing. By "solar battery chargers," we mean lightweight, lower-wattage devices that can directly charge personal electronics while on the go, typically via USB port. "Portable solar panels" are their larger, heavier, and higher-power siblings.

### How much power does a solar battery charger produce?

The most compact and lightweight solar battery chargers typically produce somewhere between 15 and 50 watts of max power. Devices in this wattage range are best suited for charging personal electronic devices, like cell phones, Bluetooth speakers, smartwatches, and GPS devices, or small external power banks that you could use to top off a phone.

### Can a solar battery charge a portable power station?

Some of the higher-wattage models can help keep a portable power station charged, for running appliances like mini-fridges, lights, or air conditioners. Consumer Reports recently evaluated solar battery chargers and portable

solar panels from a number of popular manufacturers, including Jackery, Allpowers, Renogy, and BigBlue.

Can a solar panel charge a mobile phone?

This solar charger is compatible with low-power devices, such as mobile phones and tablets. What types of ports does the solar panel support?

What is its output wattage?

The solar panel has a USB-C port (5V/3A) and a USB-A output port (5V/2.4A).
