Solar panels for home prices

Overview

Residential solar panel systems cost, on average, \$20,650 [1], though prices can range from \$17,400 to \$23,900, depending on various factors. To break this price down further, solar panel costs per kWh can vary from \$2.77 to \$2.95, which makes them more cost-effective than ever before.

Residential solar panel systems cost, on average, \$20,650 [1], though prices can range from \$17,400 to \$23,900, depending on various factors. To break this price down further, solar panel costs per kWh can vary from \$2.77 to \$2.95, which makes them more cost-effective than ever before.

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

The cost of installing solar is far less intimidating when you understand the various components, how savings are generated, and different ways to lower your cash outlay through financing. In this article, we’ll explore: Do solar panels really save you money?

As always, our goal is to empower you.

This article breaks down how much solar panels might cost you in 2025 and how much money you could save in the long run. Solar panel cost breakdown: What are you paying for?

Understanding what makes up the cost of a solar system before purchase helps you make smart choices about your home solar.

Solar panels cost about \$21,816 on average when purchased with cash or

\$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans. Our team of solar experts.

Residential solar panel systems cost, on average, \$20,650 [1], though prices can range from \$17,400 to \$23,900, depending on various factors. To break this price down further, solar panel costs per kWh can vary from \$2.77 to \$2.95, which makes them more cost-effective than ever before. It's. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Do solar panels save money?

If your solar panel system is large enough to cover your entire energy usage, and you have a backup solar battery on hand, you can save 100% on your electricity bill. Most homes have smaller systems that cover a portion of their energy bills, however. In our solar survey, 67% of respondents said they save more than \$50 per month.

Why do solar panels cost so much?

Another factor influencing solar panel costs is the type of panel you have installed. Monocrystalline photovoltaic (PV) panels are the most common — and preferred — type of solar panel. They are also the most efficient option, which means that they often cost more than panels with lower efficiencies.

How much do Solar shingles cost?

Solar panels are the most popular choice for solar energy, but they are not the only option. If your budget allows, solar shingles cost \$4 to \$14 per watt and look like traditional roof shingles, blending in better with the surroundings and offering a sleeker alternative to standard solar panels. Are solar panels worth it?

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.
