Explore the best solar panels for homes, featuring top options from Blue Raven Solar and other leading solar providers. Learn how to choose the right panels for your energy needs and budget.

Explore the best solar panels for homes, featuring top options from Blue Raven Solar and other leading solar providers. Learn how to choose the right panels for your energy needs and budget.

A home solar energy system costs between \$18,000 and \$20,000 before any incentives and typically saves homeowners around \$1,500 annually. The installation cost of solar panels and electricity bill savings depend on local electricity rates, the solar company you choose, how much sunlight your roof.

Going solar is a major investment, and choosing the right solar panel company for the job can make or break the effectiveness of your solar system. Fortunately, there are many excellent solar companies on the market offering advanced technology, affordability, high efficiency, trouble-free customer.

Solar panels are used to power everything from calculators to sports stadiums to satellites — and they can just as easily be used to power a home. You don't need to be a rocket scientist — or anything close to it — to get solar panels for your home. Today, going solar is a routine home improvement.

Adding solar panels to your home could be long overdue. Why trust EnergySage?

Once reserved for climate-conscious homeowners willing to shell out a pretty penny, solar panels now cover the rooftops of millions of U.S. homes. Why'd they become so popular?

The cost of solar has come down.

To find the best solar panels, we analyzed thousands of models from hundreds of manufacturers featured on the EnergySage Marketplace. We compared key factors like efficiency, power output, performance in warmer temperatures,

and warranty coverage. Five brands stood out: Maxeon, VSUN, REC, Qcells.

Choosing the best solar panels for your needs can be a complicated decision. You have to consider multiple factors, like price, performance, aesthetics, and warranty coverage—and don't forget, a warranty is only as good as the company that stands behind it. Luckily, our solar experts have.
