

Solar panels for home worth it

Overview

Are solar panels worth it?

Solar panels are worth it if you already own your property, are dealing with high energy bills and can get solar panels installed that don't come with a huge price tag. It's even more worth it when you can take advantage of tax credits, incentives and rebates.

Are solar panels a good choice for your home?

Homes that have energy usage in excess of 500 kilowatt hours (kWH) per month are usually excellent candidates for solar panels. If the solar panel system produces excess energy, or more energy than the home uses, homeowners can sell the extra energy output to the local utility company each month.

Is a home solar energy system a good option?

A home solar energy system is one of the most popular and efficient alternatives to traditional power sources. Solar panels have many environmental benefits and can save homeowners money over the long term. While costs have decreased over the past years, installing and maintaining solar panels can still be expensive.

Is going solar worth it?

If you don't have high energy costs or your state makes it harder to go solar, it might not be worth it financially. Even after weighing all the pros and cons, the decision to go solar is a highly personal one.

Do solar panels add value to your home?

According to the US Department of Energy's Lawrence Berkeley National Laboratory, solar panels can add serious value to your home and sell quicker than homes without solar. A recent study found that, based on the average home cost, homes with solar sell for 6.8% more, adding a value of around

\$25,000. Solar panels can add to your home's value.

Are solar panels a good investment?

According to the Consumer Price Index, electricity prices were up 2.8% for the 12-month period ending in March 2025. Depending on its size and your energy needs, a solar panel system can reduce or eliminate your electric bill. Residential solar panels allow you to pull less energy from the grid.
