

# **Solar panels for houses cost**

## Overview

---

How much does a solar panel cost?

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt. The cost of a solar panel also depends on how you buy it.

Are solar panels worth it?

The federal solar tax credit may reduce the net cost to \$20,552, and local incentives can further lower the cost. You can determine whether solar panels are worth it for your home by considering various factors, such as local incentives and policies, your electric bill, and how you finance the system.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

Should I get solar panels for my home?

Today, going solar is a routine home improvement project that comes with the benefits of energy cost savings, reduced emissions, and increased home value. In this article, we'll cover everything you should know about getting solar panels for your home so you can make informed decisions as you navigate the process. Topics in this article:.

Are home solar systems expensive?

Home solar systems have an outdated reputation for being an expensive luxury item that only wealthy homeowners can afford. However, the cost of solar has plummeted in the last several decades and there are state and

federal incentives that make it accessible to many homeowners. According to the Solar Energy Industry Association:.

Do solar panels increase home value?

Speaking of putting wasted space to good use, installing solar panels also raises your home value. Studies by Zillow and the Berkeley Lab both found that homes with solar panels sell for more money than comparable homes without them. Better yet, over 30 states have property tax exemptions for the value that solar adds to the home.
