This guide explains the Missouri solar incentives, rebates and credits residents can register to receive, and provides valuable information on solar power home installation and how to on choose the best panel solar system for your property.

In this comprehensive guide, we present an insightful overview of the best solar companies in Missouri, from Kansas City to St. Louis and everywhere in between. We'll also unravel solar installation prices and the various financial incentives, tax credits and rebates that await Missourians deciding.

You'll need to install a 12.18 kW solar panel system to cover the average electric bill in Missouri, which will cost you about \$22,500 after the federal tax credit. As long as your federal tax bill is high enough, you can take advantage of the federal investment tax credit (ITC). Compare multiple.

Solar photovoltaic (PV) panels directly produce electricity from sunlight, while solar thermal technologies capture the sun's heat for water or space heating. As of 2023, almost 80% of the solar energy generation in the state of Missouri came from smaller systems such as those on rooftops; this.

With professional installation, a typical 8-kilowatt residential solar panel system in Missouri costs \$21,109. That price drops to \$14,776 after the full 30% federal solar tax credit. How much you actually pay depends on the size of your system, what incentives you're eligible for and other.

As of 2025, the average cost of solar panels in Missouri is \$2.93 per watt, making a typical 7.2 kilowatt (kW) solar system \$14,767 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States, which.

Missouri offers residents and businesses clean energy incentives to install solar panels and invest in clean energy vehicles. In combination with federal tax credits for green energy, the cost of any new equipment installed can qualify.\*\* PLEASE NOTE: Beginning in 2025, the federal tax incentives. Are solar panels worth it in Missouri?

Missouri has one of the most helpful criteria for solar panels: a good amount of year-round sunlight. That can help your solar panels pay for themselves more quickly than in cloudy regions. Paired with the 30% federal tax credit and relatively low costs for solar panels in Missouri, it can be worth it to install solar panels.

Do solar panels make homes more attractive in Missouri?

The consensus is that solar panels do make homes more attractive to customers in Missouri. According to a 2022 survey, 63% of people in the Midwest said they are “more likely” or “much more likely” to buy a home with solar panels. How do you find a reputable solar installation company in Missouri?

How do I find a good solar installation company in Missouri?

The Forbes Home team extensively researched solar installation companies in Missouri and provided ratings based on a number of metrics, including public reviews. You can also check a company’s standing with the Missouri Secretary of State and review complaints filed with the Better Business Bureau.

Why do people install solar panels in Missouri?

In the Midwest, including Missouri, 65% of people who installed solar panels said their main motivation was “energy independence.” With efficient solar panels and the well-reviewed Tesla Powerwall battery, Tesla makes it possible to reduce dependence on the traditional energy grid.

How many solar panels does Missouri solar solutions install?

Two years ago we had Missouri Solar Solutions install 14 solar panels on our south-facing roof, and last year we had them add 14 more to our west-facing roof. Both times we were extremely impressed with the quality of their work and the professionalism of the team that did the installation.

## How much does solar cost in Missouri?

Levelized cost of power from this typical solar system installed on a home in Missouri over 25 years is 5.9 cents/kWh. Average cost of utility power over 25 years (if you don't get solar) is 19.4 cents/kWh. This shows that solar is a far cheaper way to power your home in Missouri over the long term.
