

1820A-50
12.0V/50Ah

CAUTION!

Do Not Short-Circuit
Do Not Overcharge
Do Not Discharge to Dry Cell
Do Not Charge at High Current
Do Not Charge at High Voltage
Do Not Charge at High Temperature
Do Not Charge at High Humidity
Do Not Charge at High Pressure
Do Not Charge at High Altitude
Do Not Charge at High Latitude
Do Not Charge at High Longitude
Do Not Charge at High Altitude
Do Not Charge at High Latitude
Do Not Charge at High Longitude

Weight: 18.2kg (40.1lb)
Dimensions: 182mm x 182mm x 182mm
Capacity: 50Ah (20hr rate)
Voltage: 12.0V
Discharge Current: 5.0A (20hr rate)
Charging Current: 5.0A (20hr rate)
Charging Voltage: 14.4V (20hr rate)
Operating Temperature: -20°C to 50°C
Storage Temperature: -20°C to 50°C
Shelf Life: 3 years (at 25°C)

Overview

Should you buy a home with solar panels?

A home with solar panels has lower electricity bills than an equivalent home without solar panels. Over the life of the solar system, the savings exceed the higher up-front price of the home. Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Going Solar.

Should you add solar panels to your new home?

Adding solar panels to newly constructed homes can increase the sale price, attract new customers, and distinguish a homebuilder and their homes among competitors. A SETO-funded study found that homeowners across the country have been willing to pay a premium for homes with an average-size solar array.

Does SunPower have a new home?

SunPower's latest achievement revolves around new home construction, recently topping our 100,000th home with a fresh set of solar panels. What happens once you sign the dotted line?

.

Does your new home need a rooftop solar system?

Once you are setup, SunPower will take it from there. In 2020, California became the first state to require net zero energy construction on all new homes, including a mandate that all new homes include a rooftop solar component. The SunPower New Homes Department is here to help you understand how this mandate affects new home buyers like you.

Can solar PV be used in New construction?

Integrating solar photovoltaics (PV) into new construction is becoming more

and more popular in the United States. In California, rooftop solar PV became a requirement on newly built homes starting in 2020 and in some cities, this rule also applies to major renovations.

Are solar-ready homes a good investment?

Solar-ready homes can be appealing to homeowners who might want solar panels in the future but are not ready to make the initial investment. Solar-ready homes will also lower the cost of installing solar for homeowners, so this option can command a sales price premium.

Solar panels in all new homes

[Solar Panels to Be Installed on Most New Homes in ...](#)
