Solar panels are used to power everything from calculators to sports stadiums to satellites — and they can just as easily be used to power a home. You don't need to be a rocket scientist - or anything close to it - to get solar panels for your home. Today, going solar is a routine home improvement.

Solar projects are making it easier for Americans to choose solar energy to power their homes. *Vea esta página web en Español* Since 2008, hundreds of thousands of solar panels have been installed across the country as more and more Americans choose solar energy for their daily lives. Investments.

Solar power is an increasingly popular option for homebuyers who want to cut their energy bills, reduce their carbon footprint or both. Whether you're a home builder or a remodeler, consider adding solar panel installation as part of your services to make your business more competitive. This guide.

A home solar energy system costs between \$18,000 and \$20,000 before any incentives and typically saves homeowners around \$1,500 annually. The installation cost of solar panels and electricity bill savings depend on local electricity rates, the solar company you choose, how much sunlight your roof.

Adding solar panels to your home could be long overdue. Why trust EnergySage?

Once reserved for climate-conscious homeowners willing to shell out a pretty penny, solar panels now cover the rooftops of millions of U.S. homes. Why'd

they become so popular?

The cost of solar has come down.

A professional solar panel crew installs panels on the roof of a house in Washington state, USA. In 2024, rooftop solar was the fastest-growing source of electricity worldwide, according to data from the U.S. Energy Information Administration. Yet many homeowners still hesitate because of cost.
