Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of.

This data is expressed in US dollars per watt, adjusted for inflation. IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies 'Thin film a-Si/u-Si or Global Price Index (from Q4 2013)'. IRENA (2024); Nemet.

Solar panels cost between \$15,000 and \$22,500 on average. Get custom quotes from the top installers in your area using the form below. Tori Addison is an editor who has worked in the digital marketing industry for over five years. Her experience includes communications and marketing work in the.
