## Overview

What is a solar generator?

A solar generator captures and stores solar energy in a portable power station using solar panels. EcoFlow solar generators feature high-efficiency panels, flexible power outputs (300–7200W), and durable, portable designs built to last.

Can a portable solar generator be used as a backup power system?

Most portable solar generators are designed for backup power in emergencies rather than whole-house power. However, larger capacity generators, typically 2000W or higher, along with multiple solar panels and power stations combined, can effectively serve as a backup power system for an entire home during outages.

Can a solar generator use solar power?

A solar generator can't actually harness solar power unless you have both. What's more, most of these generators are large enough that charging up exclusively with solar power usually isn't feasible: More often than not, you'll need to plug it in to charge, then use solar power to keep it going as long as possible.

Do portable solar generators really work?

Amid the range of power stations, portable “solar generators” give you a way to draw in clean electric power from our most abundant resource, sunlight. However, using one effectively is a little more complicated than many people realize.

What are solar generators used for?

Solar generators are versatile and can be used in a variety of situations. Here's a quick breakdown of where they shine: Home Backup Power: Perfect for keeping essential appliances like refrigerators, lights, and medical devices

running during power outages. Outdoor Adventures: Reliable power for camping, RV trips, or off-grid explorations.

Which solar generator should I buy?

If you want a solar generator that can keep most of your appliance running during a power outage, the Lycan 5000 Power Box is a great pick. With an output of 3500W, it can not only power almost any household appliance, it can power several at the same time. In an emergency, you can keep using your fridge, TV, washing machine, and other appliances.
