A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit. NOTE: Under the "One Big Beautiful Bill Act" signed in July 2025, the federal solar.

The cost of solar has come down significantly over the past decade, while electricity prices have skyrocketed. Solar prices continue to fall, but the elimination of the federal solar tax credit will reduce savings for homeowners who go solar after December 31, 2025. This federal incentive currently.
