Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole-home solution.

Are solar power systems right for You?

Solar power systems are leading the global movement toward clean, renewable energy. If you own your home and think you are paying too much for electricity, then solar power may be the right clean energy option for you. When you go solar, you get more control of your monthly electricity costs.

How much energy do solar panels produce?

How much energy your solar panels will produce depends on the number and size of your solar panels, the efficiency of their cells, and the amount of sunlight hitting your roof. Please set up an in-home consultation with a solar panel installer to discuss how much energy your solar panels will produce.

How do I hire a solar power installer?

Once you've determined your needs and are ready to move forward with your solar project, hiring a solar power installer is much like hiring any contractor. Make sure you get multiple estimates based on the same criteria, get referrals, check your installer's certification, and get everything in writing.

Should you buy or lease a solar energy system?

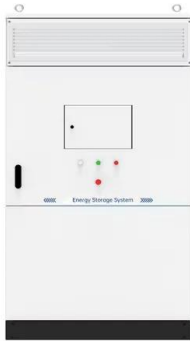

As a homeowner, powering your home is a significant monthly expense. Installing solar panels can affect your costs and your lifestyle. You can either

purchase a solar energy system outright or lease a system. When a third party owns the leased system, you host it on your roof and buy back the electricity.
