Search for a city, state, or zip code to see solar potential and impact across

entire geographic areas. We currently have solar data for portions of 50 states and Washington DC. See if we've got you covered. Project Sunroof is a solar calculator from Google that helps you map your roof's solar. How do I find the best solar panel installer near me?

There are five steps to finding the best solar panels provider near you. Find a network of trusted installers for your solar system, solar panels and electricity needs. Find a solar panel installer today! 1. Understand the Costs and Credits.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

Where can I find solar data?

Search for a city, state, or zip code to see solar potential and impact across entire geographic areas. We currently have solar data for portions of 50 states and Washington DC. See if we've got you covered. Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential.

How can I find a solar company in my area?

To find a solar company in your area, you can use [SolarNearMe.com](https://www.solarnearme.com). Compare prices and reviews, and get quotes from the best solar companies in your area.

How do I choose a solar company for my home?

When beginning your home solar project, you might start by searching "Solar Providers Near Me." Then, you'll be presented with dozens of different solar companies to choose from. All of these installers will vary in size, equipment offerings, and reputability, and it can take months to line up multiple quotes. But there's a better way.

Should you go solar with your home's energy?

Going solar with your home's energy is expensive, but, in most states, the panels will pay for themselves by reducing your electric bills. Solar panels don't produce greenhouse gasses or other pollutants, meaning you can feel

good about using this renewable energy source to power your home.
