

Solar power panel installation reviews

Overview

How do I choose the best solar installer?

A quality solar installer will typically install quality solar panels, so your main focus should be choosing the best solar installer for the job—your installer's experience and your solar system's size have a bigger impact on effectiveness. Still, every home is different, and most will benefit from having the most efficient panels on the market.

How do I choose the best solar panels for my home?

To help calculate the best solar panels for homes, the Forbes Home editorial team analyzed 19 solar companies, with each company's star rating determined by evaluating a variety of metrics, including years in business, panel variety offered, the results of our NPS survey and more.

Do you need more solar panels for your home?

The larger the home, the more solar panels needed. When adding solar panels to an existing home, you can determine the customer's monthly energy consumption based on their power bills. For the most accurate estimate, divide the annual usage by 12 for the average monthly energy usage.

How do I install solar panels?

Ground-mounted panels can be installed anywhere with good sun exposure and enough open space. A minimum of 350 square feet is usually required. Installing solar panels requires the following steps: Plan the solar energy system based on the home's size, location and energy needs. Measure, cut and assemble the support structure for the solar array.

Do solar installers have an expert rating score?

Many installers offer incentives for positive reviews, drowning out negative reviews and inflating their review score. To counter this – and provide consumers a rigorous, data-based assessment – we have developed an

expert rating score for solar installers based on several ranking factors.

Are solar panels a good investment?

Solar panel installation costs have dropped significantly in the past decade. Solar energy systems can make new homes cost more and increase a home's selling price. The expense of installing solar panels can show returns in 5-10 years with lower power bills, depending on the home's location and energy needs.
