

Solar power systems for homes near me

Overview

Can solar panels power a home?

Solar panels are used to power everything from calculators to sports stadiums to satellites — and they can just as easily be used to power a home. You don't need to be a rocket scientist - or anything close to it - to get solar panels for your home.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

Does Home Depot install solar?

During your free in-home consultation, The Home Depot's local solar power installer will clearly explain the installation process and how easy it is for you to go solar. By powering your home with clean, renewable solar energy, you're creating a healthier environment and conserving natural resources.

How many solar panels do I Need?

The number of solar panels you'll need to meet the energy demands of your home depends on your home's location and roof size. Please set up an in-home consultation with Home Depot's local solar panel installer to discuss how many solar panels you will need. How much energy will my solar panels produce?

.

Why should I get solar panels for my home?

There are a handful of reasons to get solar panels for your home, but the

biggest one is energy cost savings. Home solar is simply much cheaper than paying for grid electricity, and can lead to tens – sometimes hundreds – of thousands in savings over the warranty period of the panels.

Should I hire a professional to install my home solar panel?

Whether you use EnergySage or connect with installers independently, we recommend hiring professionals to install your home solar panel system. A DIY installation can be costly and dangerous, and the best products can't be bought online or at a hardware store.
