

Solar powered fountain pump kit 10 v 7w

Overview

What is a solar fountain pump kit?

The Solar Fountain Pump Kit allows you to create small waterfalls, fountains, or any other indoor or outdoor water feature you can think of. This highly efficient pump is compact, submersible and offered exclusively by SC Origin. The pump produces flow rates of 30-45 gallons per hour and can raise water up to 2 feet within a tube.

Can a solar water pump make a fountain?

Solariver's solar-powered water pump can create beautiful fountains — even pushing water 4-6 feet in the air. Since not all water features need that much power or volume of water, some of our solar water pumps come with adjustable valve control so you can control the water flow.

What is a solar powered water pump kit?

Solariver™ Solar Powered Water Pump Kits are designed for bird baths and fountains. Our kits offer convenient functionality and numerous benefits including dry-run protection, adjustable flow settings and non-toxic to animals and wildlife.

What is the best solar fountain pump?

The PondXpert SolarShower 200 with Battery & LED is a 'state of the art' solar fountain pump that is excellent at providing a water fountain and for aerating your pond. It is feature-packed and would prove a welcome addition to any garden.

Do you need a solar water pump for a birdbath?

Experience cost savings, sustainability, and the ease of solar power for your birdbath, fountain or other outdoor water feature. Absolutely. You get all the benefits of a high-functioning water pump without the need for plugging into electricity — or paying for it. These pumps work well with minimal

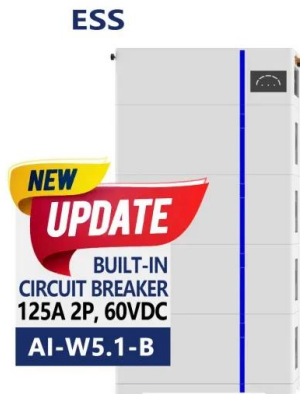

maintenance and are long-lasting, too.

How many gallons of water can a solar water pump move?

A general rule of thumb is to choose a pump that can move 100 gallons of water per hour per inch of waterfall width. In other words, you should only need about 100 to 160 GPH for a small waterfall. We offer a solar water pump quiz to help you find the right pump for your project. Does my fountain have to be deep for the solar pump to work?
