

Solar powered hot wire fence

Overview

Can a solar fence charger power an electric fence?

Electric fences can be above-ground electrified wire fences that work as a physical boundary, or they can be buried-wire invisible fences that only produce a shock to animals wearing a corresponding collar. A solar fence charger can power rechargeable invisible fence batteries and above-ground electric fences alike.

How do solar electric fence chargers work?

These solar electric fence chargers absorb light and convert it to usable energy to electrify your fencing. For extra reassurance, choose an electric fence charger with various power sources. Many can be plugged in, or use a combination of solar power and backup batteries.

How do you connect a solar panel to a fence?

Attach the fence's ground wire to the post with the green knob and the live hot wire to the red knob. Remember to turn your charger off before making any connecting wire adjustments and then turn it back on so it continues to gather solar energy. Knobs are designed to be under the charger to reduce exposure to the elements.
