Which pond pumps are best for small ponds?

The smaller pumps are supplied with Solar Panels and also contain a float, making these ideal for small ponds. The more powerful OASE 12 Volt Pumps can be connected to our range of Solar Panels to provide more substantial water cascades or outdoor fountain displays in water features and garden ponds.

How does a solar pond pump work?

Solar pumps utilise photovoltaic (PV) panels to convert sunlight into electricity. This electricity powers a pump that circulates water through your

pond's water features. Solar pumps usually come with a battery backup system that stores excess energy, allowing the pump to continue functioning during cloudy periods or at night.

What are the different types of solar powered pond pumps?

There are multiple types of solar powered pumps, with the main two being submersible and external pumps. Submersible pumps are the most common type, and they usually come with both the pump and the fountain head included. They are designed to be placed on the floor of the pond with the fountain head above the surface of the water.
