

Solar powered shipping container vent

Overview

Our exhaust fan operates on solar power, harnessing the energy from the sun to provide continuous ventilation without the need for external power sources. This energy-efficient solution reduces electricity consumption and helps maintain a comfortable environment within the container.

Our exhaust fan operates on solar power, harnessing the energy from the sun to provide continuous ventilation without the need for external power sources. This energy-efficient solution reduces electricity consumption and helps maintain a comfortable environment within the container.

Powerful Function: The solar ventilator has two Powerful ventilation fans, blowing fresh air into the container, accelerating air circulation, making the air inside and outside the container the same, with little temperature difference, effectively preventing condensation in winter and overheating.

The BIG AIR 400 CFM Solar Powered Roof Vent is engineered to be installed on the roof of shipping containers. The vent comes with a $11\ 7/8\ x\ 14\ 11/32$ range hood filter (Bug Screen) In order to exhaust the full 400 CFM, 2 Big Air 45 Vents are required for air intake. As an Amazon Associate, we earn.

The custom-designed aluminum framing kit allows the BigAir 57 CFM Solar Vent to be installed anywhere on shipping container sidewalls, end walls, or doors – from floor to ceiling. Eliminate moisture and excess heat with our state-of-the-art computer-modeled design! Designed to be installed anywhere.

These 2.5" intake vents are the ones we recommend you install on your shipping container near the floor so air movement will come in low and help push the hot air out of the exhaust vents at the top of your shipping container. BEST DEAL: For every two Conex Solar Blaster products (RoofBlasters or.
