

Solar powered water pump nz

Overview

What is a solar-powered water pumping system?

Each solar-powered water pumping system is made up of a Lorentz pump end, brushless, 3ph pump motor and a controller. This modular concept keeps all the electronics above ground providing ease of access for simple servicing which in turn makes these very economical to own.

Can a Lorentz solar pump help a New Zealand farm?

Remote water sources will never again be a problem for New Zealand farms. With a Lorentz solar pump, you can draw water from anywhere and any source, or work with an irrigation system you already have and operate. With efficient water supply and management in place, good land is used to its full capacity.

What are the best water pumps NZ has to offer?

The best water pumps NZ has to offer makes use of solar power systems. Increase the supply of water and benefit from the abundance of clean, alternative energy with Lorentz pumps. If you have an excellent water source within your farm that's beyond the reach of any power source, it might well be worth a look.

What is a Powertech solar powered water pump?

This mutli-application Powertech solar powered water pump comes with its own solar panel, cable and pump assembly ready to go. A convenient functional solution which is simple to clean and move to different locations. Note: Flow rate can be adjusted by sliding the small tab on pump.

What does a solar powered pump do?

The primary function of a solar powered pump is to supply water to high country farms. Well reticulated and accessible water on a stock farm will increase stock numbers, slaughter weights and lambing and/or calving

percentage. Please refer to our Resource pages for a complete list of documents.

How much does a solar water pump cost?
