Solar pv installer near me

Overview

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole-home solution.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

Does Home Depot install solar?

During your free in-home consultation, The Home Depot's local solar power installer will clearly explain the installation process and how easy it is for you to go solar. By powering your home with clean, renewable solar energy, you're creating a healthier environment and conserving natural resources.

Do I need a license to install solar panels?

An electrical license is an absolute requirement. An installer with the North American Board of Certified Energy Practitioners (NABCEP) Certification is also a major plus (and a requirement to be on Solar.com's platform). When you search for local installers, make sure to ask if they are NABCEP certified or check their website for the logo.

How do I choose a solar company for my home?

When beginning your home solar project, you might start by searching "Solar Providers Near Me." Then, you'll be presented with dozens of different solar companies to choose from. All of these installers will vary in size, equipment

offerings, and reputability, and it can take months to line up multiple quotes. But there's a better way.

What are people saying about solar installation services in Los Angeles?

What are people saying about solar installation services in Los Angeles, CA?

"Tim and the team at AWS Solar did a very thorough job explaining what and why we needed to have a specific system that would satisfy our household's needs. High quality install and recommendations of areas that needed repair in advance of install.
