

Solar rain barrel pump with battery backup

Overview

Why do you need a solar rain barrel pump?

Rainwater is chemical-free, so it can be healthier for your plants. Pond and water feature maintenance: A solar rain barrel pump can help you keep your water features clean. Fish and plants thrive more when water circulates, not stagnates.

Can solar rain barrel pumps boost property value?

They can also boost your property value. These are some of the ways homeowners use solar rain barrel pumps: Garden irrigation: You can connect the system to a sprinkler or drip irrigation system underneath your garden beds. Rainwater is chemical-free, so it can be healthier for your plants.

How do I install a solar rain barrel pump?

Installing a solar rain barrel pump can be a straightforward DIY project. Here are some tips for a successful setup: Choose a sunny location: Choosing the right spot will maximize how much energy the solar panel can produce. Ideally, it should get at least 6 hours per day of direct sunlight.

How much water can a rain barrel pump move?

It can move 1,350 gallons of water per hour (gph), making it one of the most powerful and efficient rain barrel pumps available. It's pricier than some of the other kits, but you can use it with any rain barrel type or connect a hose that gives you extra distance so you can spray down your car.

How far away do you need to run a rain barrel pump?

To run them, you need a 12-w att solar panel about 16 feet away. You can purchase an extension cord if you need more distance between the pump and panels. This system runs entirely on solar energy and is independent of power batteries. Its durability exceeds most of the rain barrel pump systems.

Can you make a water fountain with a solar pump?

Bring your pond to life, create your own water fountain by using this extraordinary Sunnydaze Decor Solar Pump and Panel Kit with Battery Pack and LED Light.
