How do I find the best solar panel installer near me?

There are five steps to finding the best solar panels provider near you. Find a network of trusted installers for your solar system, solar panels and electricity needs. Find a solar panel installer today! 1. Understand the Costs and Credits.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern

Hemisphere). Investing in a solar power system is easier today than ever before.

Does Home Depot install solar?

During your free in-home consultation, The Home Depot's local solar power installer will clearly explain the installation process and how easy it is for you to go solar. By powering your home with clean, renewable solar energy, you're creating a healthier environment and conserving natural resources.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole-home solution.

What does a solar installer do?

According to the Bureau of Labor and Statistics, "Solar photovoltaic (PV) installers assemble, set up, and maintain rooftop or other systems that convert sunlight into energy. Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid."

How much does it cost to install solar panels?

The average cost to install solar panels is \$12,600 to \$37,800 for a 6 kW to 12 kW system, after subtracting the 30% federal tax credit. Residential solar panels cost \$3.00 to \$4.50 per watt, including installation. However, the cost of solar panels continues to decrease each year as solar energy becomes more popular.
