How can I teach my kids about the Solar System?

Teach your kids about the Solar System with this printable fact sheet. Introduce them to the Sun and the eight planets that orbit it. This workbook also covers smaller bodies like asteroids and comets. It includes 48 full-color pages, a turn-and-learn info wheel, and special carrying folders, helping kids take their knowledge of stars and planets to the next level.

What can I do with the planets worksheets?

You could use the facts in each of the worksheets as inspiration for a painting or drawing of each planet – making sure you get the Great Red Spot of Jupiter, or the icy winds of Neptune for example. If you create a piece of art for each

planet, you could even put together your own giant solar system mural on the wall!.

What did our Solar System look like billions of years ago?

The solar system formed out of a big cloud of gas and dust about 4.6 billion years ago. Stars and solar systems that are very similar to the Sun are now forming in the Eagle Nebula (also known as M16). While this is not a picture of our own sun, it can give you an idea of what our solar system looked like billions of years ago.
