

# **Solar system for children videos**

## Overview

---

How can I Help my Children learn about the Solar System?

1. Make your own 'Planeterium': Using their understanding of the solar system, pupils to use a cereal box, shoe box or similar to create their own planetarium. Pupils to re-focus on the characteristics of the key features and how these can be replicated in their design. 2. Planet sorting activity: Use flash cards with planet names and images.

What do we see in Part 1 of Solar System?

In part 1 we see the first ten objects – Show more Solar System for Kids video – Exploring Space. Watch as Jupiter takes us on a journey around our Solar System and all the main space objects in it. Watch as we see Planets, Dwarf Planets, Asteroids and many more Solar System objects.

What can you learn in a Solar System adventure?

They'll also learn about the bright and powerful Sun, as well as Earth's Moon, which lights up our night sky. It's a perfect way to learn solar system basics while keeping things fun and engaging. Whether it's Jupiter's giant storm or Saturn's shiny rings, this adventure is full of wonder and discovery! But that's not all!.

How big is our Solar System?

Our solar system is huge and it's just one of nearly 4000 star systems in our galaxy, the Milky Way. So there is still so much more to discover out there in space! Download/print a transcript of the video. In this video, narrated by Maddie Moate, a group of children explore the planets of our solar system.

How was our Solar System formed?

Each planet has its own unique story and personality. We'll also uncover the secrets of how our solar system was formed billions of years ago from a swirling cloud of gas and dust.
