# **Solar system for home electric bill**

## Overview

---

Do I still have an electric bill after installing solar panels?

Yes, you'll still have an electric bill before and after your solar panels are installed and producing clean energy. However, the balance due on your monthly bills will be much lower – or even negative – because your solar production replaces and offsets the cost of buying grid electricity from your utility.

Do solar panels lower your electricity bill?

Energy cost savings is often the primary reason homeowners invest in solar panels. But what exactly happens to your electric bill before and after installing solar panels?

In this article, we'll explain exactly how solar panels lower your electricity bill so you don't end up saying, "I have solar panels. Now what?"

".

How much will a solar system save on my electric bill?

How much you will save on your electric bill with solar depends on seven key factors: Whether your solar system is sized to cover all of your electricity consumption. How many hours of sunlight your home gets. How much your solar panels cost. Whether you leased your solar system, got a loan or paid cash for it.

Do solar panels get a credit on my electricity bill?

Alternatively, if your solar panels produce more electricity than you use in a given month, you may see a credit on your electricity bill, depending on your utility company's net metering policy. Net metering is a solar incentive that compensates you for excess solar electricity generation.

Do solar panels pay for electricity?

So, you'll still have a utility bill after getting solar panels, but you will only be charged for the minimal amount of grid electricity your panels don't provide or offset. Will solar panels pay for all my electricity?

Can I reduce my electric bill if I go solar?

Ideally, you'll be able to eliminate your electric bill charges after going solar. You may even see some negative bills if you can carry over net metering credits month-to-month. But, as we've explained, this might not be possible if you don't have a great net metering policy, or if you can't install a large enough solar panel system.
