## Overview

---

How to make a solar system model?

For making the model of the solar system. Firstly, you have to decide which thing you will use to make this model. Also, visualizing the final model in your mind helps a lot. Furthermore, decide the size of the ball which you will use to represent the planets and the sun. Most noteworthy, use a correct scale to build the model of the solar system.

Could a new time-lapse video help us understand our Solar System?

A new time-lapse video is helping remind us just how vast our solar system really is, NPR reports. Two filmmakers and their friends wanted to show the solar system—from the sun to Neptune —to scale, using an Earth the size of a marble.

How to create a Solar System model using balls?

Use plastic and rubber balls in varying sizes to make the sun and the planets for your solar system science project. First, draw an outline of the solar system on a sheet of chart paper, then create the planets using the balls.

## Solar system model video

### Solar System Size and Distance - Video , NASA JPL Education

See how the sizes of planets and the distances between them compare. And find out why it's so hard to create a scale model of the solar system that accurately represents both size and distance on a single screen or the page of a book. Watch en Español: Seleccione subtítulos ...

### [To Scale: The Solar System , PBS LearningMedia](#)

Observe a team as they build an accurate scale model of the solar system on a dry lakebed in Nevada in this video from Wylie Overstreet and Alex Gorosh. Use this resource to visualize the abstract concept of the size and scale of the solar ...
